

WORKSHOP

Deployment of Living Labs Approaches in Africa for Sustainable Agriculture

Discussion Starters

- How do we address differences in understanding, communication, working styles, language, and cultural backgrounds?
- How can data be collected from living labs scientifically by making it easy and simple for living lab practitioners?
- How can we foster long-term ownership of the Living Lab in an agroecosystem with limited finance?
- How do we bring together the research and innovation needs of local communities and (international) scientists?
